Portfolio: <https://saikumar-portfolio-2025.vercel.app/>

PROFESSIONAL SUMMARY

Backend Developer with 4 years of experience in designing, developing, and maintaining enterprise-level applications using Java and Spring Boot. Skilled in RESTful API development, event-driven architecture (Kafka, Solace), database management (DB2, IMS), and log monitoring (Splunk). Strong experience in CI/CD pipelines, batch processing, unit testing, and issue resolution. Proven ability to deliver scalable and maintainable software solutions.

TECHNICAL SKILLS

- 🚦 **Programming:** JAVA, SQL
 - 🚦 **Frameworks:** Spring Boot, Hibernate
 - 🚦 **Databases:** DB2, IMS
 - 🚦 **Messaging Systems:** Apache Kafka, Solace
 - 🚦 **Monitoring & Logging:** Splunk, OpenSearch
 - 🚦 **Version Control:** Git, Bitbucket
 - 🚦 **Development Tools:** Jenkins, IntelliJ IDEA, ServiceNow, Postman, Bruno, JMeter, Jira
 - 🚦 **Testing:** JUnit, Mockito
-

PROFESSIONAL EXPERIENCE

Software Engineer | Tata Consultancy Services (TCS) Dec 2021 – Present

PROJECTS

Consultant Hub | Vanguard

Java Developer | Nov 2025 – Present

Domain: Investment Management, Portfolio Modeling, Client Advisory Tools

Tech Stack: Java, Microservices, REST APIs, SQL, Splunk, Jenkins, JIRA, Cloud Services, Git

Project Overview

Advisor platform used for managing investment portfolios, analyzing performance, and supporting client advisory workflows. Integrates with multiple internal systems to ensure real-time, accurate portfolio insights.

Roles & Responsibilities

- Building and refining backend microservices and REST APIs supporting advisor workflows, portfolio insights, and client profile management.
- Designing backend logic for portfolio summaries, client actions, account insights, and data validation workflows.
- Creating Splunk dashboards and searches to improve log visibility, reducing debugging time by 20%.
- Writing thorough unit tests and performing functional API testing to stabilize release delivery cycles.
- Managing sprint tasks and development workflows using JIRA within an Agile team structure.
- Supporting computerized CI/CD processes via Jenkins for continuous integration and deployment.
- Collaborating with QA, UI, and business teams to deliver enhancements aligned with advisor and platform requirements.

GLOBAL RISK MANAGEMENT SYSTEM | American Express

Backend Developer | Dec 2021 – Oct 2025

Domain: Risk Management, Fraud Detection, Credit Limit Processing, KYC Updates

Tech Stack: Java, REST APIs, Microservices, DB2, IMS, Kafka, Solace, Splunk, ServiceNow, JMeter, Jenkins, JIRA, Git.

Project Overview

Enterprise-wide risk management platform processing 10M+ daily transactions related to credit limits, KYC updates, fraud detection, and card replacements. Ensures security, regulatory compliance, and high-availability operations across global markets.

Roles & Responsibilities

- Enhanced Java microservices by applying OOP principles, improving scalability and reducing module defects by 15%.
- Designed and expanded REST APIs incorporated with DB2 and IMS systems, improving query efficiency for high-volume transaction flows.

- Implemented Solace and Kafka-based event workflows that accelerated message processing speed by 25%.
 - Utilized Splunk for root-cause analysis and proactive monitoring, reducing incident turnaround time.
 - Created Splunk dashboards to track latency, transaction throughput, error patterns, and region-wise API performance.
 - Configured automated ServiceNow alerts and blended them with Splunk to systematize incident creation.
 - Improved unit test coverage to 85% using JUnit and Mockito, increasing release stability.
 - Performed API validation using Postman, Bruno, and JMeter, ensuring accuracy across 12+ service modules.
 - Managed sprints, user stories, and production releases through JIRA within an Agile environment.
 - Documented API workflows, deployment steps, and end-to-end integration logic.
 - Coordinated with QA and architecture teams to optimize system reliability and eliminate recurring issues.
 - Mechanized CI/CD pipelines using Jenkins, improving deployment frequency and reducing manual effort.
 - Collaborated across engineering, product, and testing teams to deliver high-quality releases consistently.
-

EDUCATION

- ❖ **B.Tech | 2021**
DVR & DR HS MIC College of Technology (JNTUK)
Kanchikacherla, Andhra Pradesh.
 - ❖ **Intermediate | 2017**
Andhra Loyola College | Vijayawada, AP.
 - ❖ **SSC | 2015**
Nirmala High School | Vijayawada, AP.
-

LANGUAGES

English, Telugu.
